- Specialty Trade

BUILD A BETTER FUTURE
in the homebuilding industry.

Training is now available in Shelby County Schools.
CAREER OPPORTUNITIES
Carpentry • House wiring
HVAC • Plumbing • Masonry*
Building & Construction Technology
*courses available at TCAT upon graduation

GREAT PAY
A major shortage of trained workers in the homebuilding industry in West Tennessee and nationwide means skilled workers are in high demand - and their pay reflects that.

In West Tennessee, the homebuilding industry currently needs 1,700 skilled workers.

The average worker in the homebuilding industry makes $14.19 per hour, more than double the minimum wage.

NO COST TO YOU
Training is available in Shelby County Schools through the Tennessee Builders Education Foundation. The program, materials and transportation are available at no cost to you.

INDUSTRY CERTIFICATIONS
This is not your average class! Students get real, on-the-job training, and program graduates are immediately eligible to take NOCTI exams and begin working in the homebuilding industry.
